## Utility

Utility is the functionality offered by a product or service to meet a particular need. It covers :

- What the service does
- It can also be used to determine whether the product is fit for the purpose that it is meant for.
- It can also be used to determine whether the service can remove constraints from the customer or support the customer's services.

## Warranty

Warranty is the assurance that a product or service will meet the agreed requirements.

It can be used to determine:

- How the service will perform.
- Whether a service is fit for use.
- It typically addresses areas such as availability, capacity, security levels and continuity.
- It requires that a service meets agreed conditions and terms that must be met.

Action Point

**PS:** I know you might agree with some of the points raised in this article or disagree with some of the issues raised.
